## BLUE HORSE BASE COAT

It is the first coat of a two-coat metallic-acrylic paint system. The system gives excellent optical effect, it has high color durability and is highly resistant to atmospheric conditions and fuels. *Hint:* If it dries, it may cause peeling over time as the varnish will not stick on it. Particular attention should be paid to black and gray colors. For this reason should be used suitable thinners according to the weather conditions.

## BLUE HORSE 2K ACRYLIC SOLID COLOR TOP COAT

It is an easy-to-apply, solid color paint developed for the painting of all kinds of vehicles, especially automobiles with two-component acrylic properties, which creates a very glossy surface. It is excellent in spreading and covering, resistant to impacts and all atmospheric conditions.

## BLUE HORSE 4+1 HS 2K ACRYLIC PRIMER

It is a 2K primer that can be used for multiple purposes, has extremely superior properties. Colorable with Blue Horse Acrylic Solid Color Top Coat.

## BLUE HORSE ACRYLIC CLEAR COAT

It is the second coat of a two coat metallic acrylic paint system. It is an acrylic varnish with fast drying and ease of application, responding to a fast workflow, very good gloss and spread under ideal application conditions, resistant to atmospheric conditions, high fuel resistance. Can be both air-dried and forced-dried.

## BLUE HORSE 2K HARDENER FAST - STANDARD

They are hardeners of Blue Horse products. Blue Horse 2K Hardener Fast should be used for repairing parts at low temperatures and for quick work in small areas. Blue Horse 2K Hardener Standard should be used in partial or complete painting processes at normal temperatures.
